

ATECO

A photograph of an ATECO HL 9 telescopic lift in use. The lift is a blue and white machine on a trailer, with a long white telescopic boom extending upwards. A worker in a red jumpsuit and blue hard hat is standing on the platform at the top of the boom, working on the roof of a green corrugated metal building. Another worker in a red jumpsuit and blue hard hat is standing on the ground next to the lift, operating the controls. The lift has 'ATECO' and 'HI-LIFT' written on the boom. The background shows a large green corrugated metal building with a yellow trim along the roofline. The sky is overcast.

HL 9

- **9.4m Working Height**
- **4.2m Outreach**
- **Incredible 0.71m Width Capability**
- **Unique 200kg Two Man Machine**
- **Full Dual Proportional Hydraulic Controls**
- **Minimal Maintenance Required. No Greasing Points**
- **Heavy Duty Machine**
- **CE Approved**

SIMPLE - SAFE - RELIABLE - HEAVY DUTY EQUIPMENT
